TRANSITGAS																																																										
Pipeline	Activities																																																									
9	TRG23-24 Yearly valves check with Swiss Authorities																																																									
10	TRG30 (Oltingue - Lostorf) MFL pig run																																																									
11	TRG30 (Oltingue - Lostorf) Cleaning pig run																																																									
12	TRG11+12 (Wallbach - Ruswil) MFL pig run																																																									
13	TRG11+12 (Wallbach - Ruswil) Cleaning pig run																																																									
14	TRG21 (Wallbach - Däniken) MFL pig run																																																									
15	TRG21 (Wallbach - Däniken) Cleaning pig run																																																									
16	TRG22 (Däniken - Ruswil) MFL pig run																																																									
17	TRG22 (Däniken - Ruswil) Cleaning pig run																																																									
18	TRG23+24 (Ruswil - Masera) MFL pig run																																																									
19	TRG23+24 (Ruswil - Masera) Cleaning pig run																																																									
Stations																																																										
20	Compressor Station Ruswil First level inspection TK-C - PGT25DLE 20MW																																																									
21	Compressor Station Ruswil First level inspection TK-D - PGT25DLE 20MW																																																									
22	Compressor Station Ruswil TK-A control system exchange and Turbine emission upgrade																																																									
23	Compressor Station Ruswil Yearly safety functions of the Ruswil compressor station with Swiss Authorities																																																									

- Legend:**
- interruption of gas transport
 - with capacity reduction (the number inside the cell points out the effective days or months of the reduction)
 - no redundancy (only the sufficient power available - no stand-by)
 - full redundancy available
 - Modulation during the Gasday.
 - Major maintenance periods: from 6th August to 26th August; Early maintenance periods: from 4th June to 10th June;
 - Additional maintenance periods as possible "second choices": from 2nd July to 15th July; from 2nd April to 6th May
